

Seven Years Stronger Together

PEOPLE | CARE | COMMUNITY

For the past seven years, Infinity Health has been proud to support the health and wellbeing of our community. Thank you to our patients, team and partners who have been part of this journey.

A message from Dr Siva

Medical Director, Infinity Health

"Infinity Health Green Square has been my medical home since June 2022. Since its opening in September 2019, the Medical Centre has continued to evolve into one of the most compassionate and comprehensive Health Clinics in Zetland, Green Square and surrounding areas.

I was initially attracted to the clinic by Shirley, the owner. Her challenges dealing with her own family and seeing first hand the implications of fragmented care in the health system was a driving factor. Having seen my own parents face similar struggles and adverse outcomes, we both jointly invigorated a team of doctors, nurses, receptionists and allied health to drive the ethos of "health care from the heart" concept with the patients' needs at the core.

We have evolved, through challenging times, to provide holistic and comprehensive care. We want to "listen, engage and develop a warm place that patients feel comfortable to come to and address their concerns." We prioritise mental health as no one is immune to its gravity. We provide after hours care access and drop everything to address parents with concerns about their children. We pride ourselves on continuity of care.

Having worked in many different parts of the world, I can personally vouch for the hospitality of the clinic both for doctors and patients as well as the expertise of the clinical care. Being the recipients of the Central Eastern Sydney Primary Health Network awards in 2024 for Excellence in General Practice was a true testament to this. We welcome people of all backgrounds, all genders, all nationalities with open arms.

It has been a privilege to lead this clinic for the last 4 years, and it really feels like another home to come to. I am sure you will feel the same with your medical needs.

Seven Years of Impact

A HEALTHIER, STRONGER COMMUNITY

Since opening our doors, we have been focused on more than just treating illness. We are here to support our community through every stage of life — from preventative care and chronic disease management to mental wellbeing and allied health support.

**Your health, our community,
a brighter tomorrow.**

IN OUR COMMUNITY

SUPPORTING PEOPLE. BUILDING CONNECTIONS

Over the past seven years, we've been proud to work with local organisations, schools and community groups to support healthier, stronger lives. These partnerships help us make a real difference — today and for future generations.

1. Investing in Future Generations

We've worked with Taylor's College, UNSW ICON and student health programs to support the wellbeing of local students.

2. Supporting Active Lifestyle

We support active lifestyles and local sporting communities, while recognising the role of physiotherapy, recovery, nutrition and wellbeing in helping people stay active and well.

3. Healthier Communities

From Heart Health Week and R U OK? Day to cancer awareness initiatives, we continue to get involved and make a difference where it matters.

RECOGNITION FOR EXCELLENCE

We are honoured to have received the **2024 Primary Health Awards** in recognition of our commitment to quality care, innovation and community impact.

CARE THAT WORKS TOGETHER PREVENTATIVE. COMPREHENSIVE. CONVENIENT.

Your health needs can involve more than one type of care. At Infinity Health, your GP can help identify areas where preventative support may be beneficial, and where eligible, develop a plan to connect you with our in-house allied health team. With GPs, physiotherapists, psychologists, dietitians and onsite pathology, you can access a broader range of care in one convenient location.

Our Ongoing Commitment

As we look to the future, we remain focused on:

Accessible, high-quality primary care. Preventative health and early intervention. Expanded services and after-hours care. Onsite pathology for added convenience. Strong community partnerships.
